Description
The Department of Economics at Università Ca' Foscari Venezia invites applications for a fellowship in:

Title:
Modelling multi-households in a CGE model for Italy

- Academic Discipline or disciplines specifically identified by the call 13/A4
- scientific coordinator and tutor: Prof. Enrica De Cian
- duration: 12 months

abstract:
The recruited postdoc will work on at developing a multiple household Computable General Equilibrium (CGE) model for Italy in order to track distributional matters (poverty and inequality) that are at the core of recently adopted 17 Sustainable Development Goals (SDGs). The researcher will develop a multi-sectors and multi-country recursive-dynamic CGE model with a detailed specification of public and private sectors. Information on specific characteristics of different population strata will be collected from recent Italian household surveys. After setting up the model, the researcher will develop business as usual scenarios, as well as policy scenarios aimed at exploring the distributional impacts of some SDG- specific policies (e.g. carbon emission reduction, income redistribution). The outcome of policies for Italy should be analysed using indicators in order to measure the compliance of these interventions to the SDG targets, and synthetic aggregate indicators will be developed.

The resolution of the Departmental Council of 2018-01-23 contains declaration of financial backing for the entire duration of the fellowship, which will be funded with funds available to the Project CMCC by Prof. Enrica De Cian.

The research may be carried out in English.
The fellowship is intended to provide the successful candidate with the opportunity to pursue his/her own research while benefiting from the range of expertise at Università Ca' Foscari Venezia.
