establishes the following:

Art. 1 - Scope

1. A public selection is announced to award n° 1 research fellowship lasting 15 months, with possibility of renewal within the limits of art. 2 of the Regulations on university research fellowship awarding, and subject to a specific contract.
The amount of the fellowship is fixed to Euro 30,562,50 gross for 15 months, at the net of expenses to be sustained by the Provider (amount subject to adjustment in the event of variations in the law).

2. The research fellowship is awarded for the purpose of collaboration with the following research programme in the Department of Philosophy and Cultural Heritage as specified below:

- **Title:** “The theoretical and practical construction of a concept of trust in science,” as part of the TRUST IN SCIENCE project;
- **Scientific Disciplinary Sector and Competition Sector Groups:** SDS: M-FIL/02 – Comp. sec. 11/C2 LOGIC AND PHILOSOPHY OF SCIENCE;
- **Scientific coordinator and tutor:** Prof. Eleonora Montuschi;
- **Duration:** 15 months;
- **Expected starting date:** 1st of June 2019;
- **Description:** The research framework aims to create the conditions - theoretical/intellectual and practical - to promote an informed and effective debate on the topic of trust in science. Talking of trust in science in the context of contemporary 'knowledge societies' might appear uncontroversial. But science today has deeply declined in credibility. This is partly due to a more general decline in trust in democratic institutions, and partly to the complexity of the problems of contemporary world, which equally require complex solutions and reliance on wide-ranging and sometimes conflicting expertise. Conflict, uncertainty, disagreement among scientific experts are often read as signs of the diminished ability of science to produce knowledge that is both reliable and useful. Rethinking the foundations of the idea of trust in science (and of trustworthiness of science) in a framework that reflects both on the theoretical conditions and on the practical applications of scientific knowledge, offers an unavoidable starting point for the revival of serious public debate on the role and social function of science. There has been considerable international interest on this topic. The focus of this research framework is to identify and secure a suitable interdisciplinary network of experience that can address this theme in a competent and novel way.

3. The selection aims to ascertain the scientific-professional requirements deemed necessary to carry out the above aims and activities.

**Art. 2 – Requirements for participation in the selection procedure**
