regard to the Decision of the Coordinator of the Temporary Centre “Project Ecosistema dell’Innovazione” Rep. n.419/2025, Prot. n.320681/2025 of 18/12/2025 establishing the research programmes for awarding of the short fellowships in “Methodologies for assessing social and cultural impact in social cooperative reuse activities” lasting 6 months, with the possibility of renewal within the limits of art. 4 of the Regulations for awarding university short research fellowships. The expected starting date is indicatively from **February 2026**.

The research fellowship is awarded for the purpose of collaboration with the following research programme of the Temporary Centre “Project Ecosistema dell’Innovazione” under the project “La sperimentazione near infrared spectroscopy per il sorting di Polivinilcloruro (PVC) e elastomeri termoplastici (TPE) in chiave di riciclo e riuso creativo”, Rif. 2024.0031 - ID 54329; CUP: H73C24001600007

abstract

The research grant focuses on developing techniques to evaluate the social and cultural effects of material reuse and recycling activities conducted by social cooperative enterprises. The research adopts an experimental framework to evaluate measurement tools suitable for contexts in which production, social aims, and cultural factors are closely intertwined, and where conventional metrics are often insufficient. The aim is to critically examine the main impact assessment approaches used in the Third Sector, circular economy, and social cooperation, evaluating their limitations and potential in relation to organised, ongoing, and territorially embedded reuse activities. Building on this review, the research seeks to select, adapt, or develop an evaluation system that integrates quantitative indicators, such as environmental and employment-related metrics, with intangible aspects, including cultural value, relationship quality, social recognition, and organisational change. The grant supports the collection and structuring of data needed for measurement, the application of the system to case studies within the project, and the refinement of an evaluation model suited to the specifics of social cooperation and reuse economies. Activities include analysing existing impact methodologies, developing a hybrid evaluation framework, testing through case studies with operators and users, and critically examining the limitations of traditional metrics. The project also considers using narrative or visual tools as supplementary means to highlight and communicate the cultural and social transformations driven by cooperative-led reuse activities.

The research fellowship amounts to Euro 14.178,00 gross to the recipient.

Deadline: 15th January, 2026. In case the deadline is on Saturdays, Sundays or on holidays it is extended to the first working day thereafter.

Rules of eligibility – Beneficiaries

Citizens belonging to European Union member states and non-community citizens in possession of the following qualifications may take part in the selection: People with **Master's Degree in Economic Sciences for Environment and Culture (LM-76)** and **PhD in Business, Management, or related fields** (or equivalent) and an adequate scientific and professional CV are eligible.

Applicants must hold all the requisites within the call deadline. The qualifications will be evaluated by a Commission that examines the eligibility and qualifications of the candidates and makes a merit rank of them.

Skills required

- Strong analytical and methodological skills in studying systems for measuring and evaluating social and cultural impact, with a research-oriented approach;
- Ability to independently design and conduct research activities, define analytical tools, and produce scientific outputs;
- Capacity to work with complex conceptual frameworks, integrate quantitative indicators with qualitative dimensions, and develop critical reflections on the limitations of conventional metrics;
- Collaborative attitude in working with researchers and practitioners, while maintaining a clear focus on knowledge production and methodological advancement.

Any other evaluable qualifications

- Multi-year experience in research activities within complex or multidisciplinary projects, preferably funded at national or European level;
- Participation in research groups on topics such as social impact, evaluation, and accountability, as well as the production of scientific contributions (articles, research reports, working papers) consistent with a focus on evaluation, reporting, and social impact.

Incompatibility

The short-term research fellowship may not overlap with:

- a) other scholarships granted in any capacity, apart from those granted by national or foreign research institutes in order to integrate with periods abroad the specific activity foreseen by the work plan of the appointed fellow;
- b) attendance of PhD courses with scholarship and medical specialization, in Italy and abroad;
- c) research grants “assegni di ricerca”

Fellowship holders may carry out self-employed work or occasional or permanent collaborations, as long as this is coherent with the ongoing research, upon approval and on the condition that:

- does not involve a conflict of interest with the specific research activity carried out;
- does not prejudice the university, in relation to the activities carried out.

Subordinate employment contracts holders, in addition to obtaining permission by the university, must provide the authorization of their employer.

In the specific case that the subordinate employment contract started prior to the awarding of the fellowship, compatibility with the existing employment will have to be assessed; if the assessment yields a negative result, the short research fellowship will not be awarded; in the case of a positive result, the successful candidate will have to provide the authorization of his/her employer within 15 days.

In the event that the subordinate employment contract will start once the fellowship is ongoing, the successful applicant is required to notify this change at least 30 days before the start of the employment contract for an assessment of compatibility; if the assessment is negative, the fellowship will cease by the start of the employment contract; in the event of a positive outcome, the successful applicant must provide the authorization of his/her employer within 15 days.

The awarding of the short-term research fellowship does not imply the establishment of any employment contract, nor does it give rise to any rights of access to positions of employment at the university.
